

"Growing in God's Love" Growing Flower Craft

What you will need:

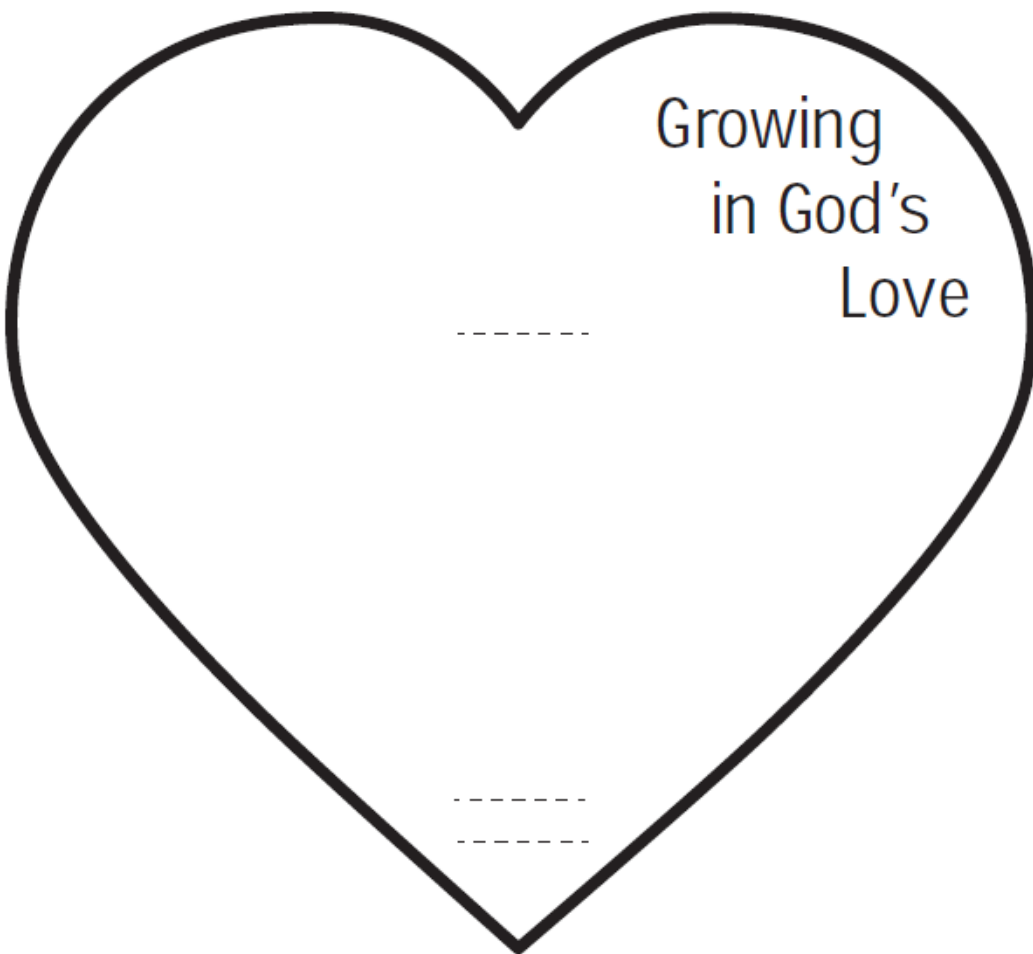

Construction Paper
Card Stock
Exacto Knife
Tape
Glue
Scissors

How to make:

1. Print out the pattern and make copies onto card stock or construction
2. Cut open the dotted lines with a razor or Exacto knife.
3. Cut out a stem from green card stock, 9" x 3/4" wide for each child.
4. Show the children how to insert the stems in the cards so that the flower can be moved up and down to look like it is growing. Provide construction paper, glue, and tape so they can customize their flowers. If you have young children, precut some flower shapes for the children who have a hard time cutting.

Flower Stems
